

# Climate Tech Finance

## Low-Cost Loans to Reduce GHG Emissions

The Bay Area Air Quality Management District's **Climate Tech Finance** program is offering subsidized financing and technical guidance to spur the adoption of emerging technologies that reduce greenhouse gas emissions. This program will evaluate and help scale up innovative, affordable technologies to reduce GHGs at public facilities and private businesses.

### Technology Evaluation and Recommendation

The Air District offers Bay Area facilities free evaluations and recommendations for emerging technologies to reduce greenhouse gas emissions. The Air District also connects facilities with companies developing those technologies.

### Financial Incentives

Low-interest financing for new technology is available for public and private organizations in collaboration with the California Infrastructure and Economic Development Bank (IBank).

Revolving Loan Funds for Public Facilities	Loan Guarantees for Small Businesses
Subsidized loans ranging from \$500k to \$30 million, up to 30-year terms	Loan guarantees up to \$2.5 million on loans up to \$20 million; projects may be eligible for up to a 90% guarantee
